

Web and Desktop Applications for Manfact

The image shows two screenshots of a software application. The top screenshot is the 'Work Order Number Search' window, which has a search criteria section with fields for 'Assembly', 'Status', and 'Whse' (set to '[All]'). Below this is a table with columns: Whse, Project Number, Work Order#, Assembly Number, Description, Status, W/O Qty, Released Date, Due Date, Issue Type, and Cost Type. The table lists 11 work orders with details like 'MOTOR, 2HP', 'CLUTCH ASSEMBLY', and 'FRAME MEMBERS'. The bottom screenshot is the 'Batch Work Order Creation' window. It has input fields for 'Work Order#' (4), 'Status' (Released (R)), 'Assembly' (XTR500), 'W/O Type' (Normal (N)), and 'Description' (POWER DRIVE ASSY.). Below these is a table with columns: Auto Create, Processed, Part#, Description, Level, On-Hand, W/O#, Quantity, Status, W/O Type, and Complete Type. This table lists 9 items with quantities and status. At the bottom of the window are buttons for 'Select All', 'Select None', 'Create Work Orders', 'Update WOBOM', 'Clear', and 'Cancel'. The account name 'MDEM05.9' is visible in the bottom right corner.

- Create and Release Work Orders for All Assemblies in a Bill of Material Structure
- Establish Parent/Child Relationship Between Work Orders for a Given Job
- Reduce Data Entry Time and Opportunity for Error
- Visibility to On-Hand Inventory Allows Operator to Revise Suggested Quantities
- Update the Work Order Bill of Material with Latest Configuration
